## EDUCATION

Vellore Institute of Technology, Bhopal

Aug 2022 – Aug 2026

Bachelor of Technology in Computer Science and Engineering - CGPA : 8.53 / 10

## TECHNICAL SKILLS

- **Languages:** C, C++, Python, JavaScript, SQL
- **Web & Frameworks:** React.js, Node.js, Express.js, Flask, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Databases & Cloud/DevOps:** MongoDB, PostgreSQL, AWS (EC2, Lambda, Redshift), Git, CI/CD, Postman
- **AI & Fundamentals:** REST API, Data Structures & Algorithms, OOPs, VS Code, IntelliJ IDEA, ChatGPT, Claude, Grok

## PROJECTS

### VTravel Buddy | [GitHub](#)

- **Built** and maintained backend services for a **full-stack MERN** travel-matching platform, enabling VIT students to coordinate campus commutes efficiently.
- **Designed RESTful APIs** for user matching and trip coordination, replacing informal WhatsApp-based coordination with a structured, scalable solution.
- Contributed to frontend development **using React.js and Bootstrap**, enhancing UI responsiveness and overall user experience across devices.
- Technologies Used: Node.js, Express.js, MongoDB, React.js, Bootstrap

### ShopEZ E-Commerce Platform | [GitHub](#)

- Designed and implemented **MongoDB schemas and CRUD APIs** for products, categories, users, and orders, forming the core data layer of a production-ready e-commerce platform.
- **Led end-to-end deployment** of the application, configuring secure environment variables and shipping to production on Render/Vercel.
- Built seamless frontend-backend integration using React.js, **enabling real-time data synchronization** with a live database for a robust shopping experience.
- Technologies Used: MongoDB, Express.js, React.js, Node.js

### Kidney and Diabetes Prediction | Healthcare ML Web Application

- **Contributed** to end-to-end design of a responsive, medical-themed front end using HTML, CSS, and Bootstrap.
- **Designed** structured health-data input forms with guided UX flow, improving form completion accuracy for end users.
- Integrated the Flask backend with trained ML models, **achieving 98% accuracy** for CKD prediction and 96% accuracy for diabetes prediction.
- Technologies Used: HTML, CSS, Bootstrap, Flask, Python

### AI-Powered Chatbot | [GitHub](#)

- Developed a conversational chatbot using **NLP techniques** to handle FAQs and generate context-aware, human-like responses.
- **Built** end-to-end pipeline from intent recognition to response generation using TensorFlow and Keras.
- Deployed the model via Flask for integration into websites and applications, enabling customer-support and assistant use cases.
- Technologies Used: Python, NLTK, Gensim, TensorFlow, Keras, Flask, NLP

## ACHIEVEMENTS

- **IBM-Certified in Generative AI Skill Development** — completed hands-on training in applied Generative AI concepts and tools. [View Certificate](#)
- **MERN Stack Certified by Smartbridge** — validated proficiency in building full-stack web applications end-to-end. [View Certificate](#)
- Active member of the Data Science Club; contributed to workshops and built foundational machine learning skills.
- Solved 500+ day diverse algorithmic and data structure problems on Leetcode.
